

Contents Of The Memory Map:

The memory map of each functional group comes with three itineraries.

Item No 1: Detailed Explanation Containing Memory Map: Where the concepts are explained in a detailed manner to understand the concepts better. This will usually take 15-25 minute of time for each memory map. This Detailed explanation Memory map helps the student to learn the concepts in an interesting and effective way. Makes the concepts easier to understand and remember.

Item No 2: Rapid Revision Memory Map: Where the concepts learnt in details for 15-25 minutes of time will be revised within 3-4minutes of time. This Rapid Revision Memory map helps the student to revise multiple times within short time span.

Item No 3: Question Bank: This contains questions from the question bank of Commisionerate of PU Board along with the questions which has appeared in Previous years board exams in the concerned concepts. This will expose the student to type of questions that might be asked in the board exam, with the number of marks specification and also the method of

answering to the questions as per the scheme of valuation. Thus, when the student is exposed to answer as per scheme of valuation obviously the scores are bound to increase.

Thus learning is complete, in-depth, easier, effective & with definite success.

Information about the Usage Of Memory Map:

Step: 1: The student after purchasing the memory map will receive the login name & password thro' the registered email id. The student after logging on to our website with this login credentials can start using the memory map for learning.

Step: 2: The student is advised to go through first with the detailed explanation memory map where the concepts are made very clear. The student can go through this detailed explanation memory map as many number of times as the student wishes. This makes the concept understanding clear and perfect.

Step: 3: After completing the practice with the **detailed explanation memory map** the student should go through the **Rapid Revision Memory Map**. This memory map helps the student to remember the concepts clearly and the student becomes perfect with the concepts with repeated practice of this Memory Map.

Step: 4: The final step will be to go through the question bank from commissionerate of PU Board & Previous Years Board exam in addition to Most likely questions. This will help the student to prepare for answering questions markwise & also as per scheme of valuation.

Step: 5: The student should go through the next memory map of the same lesson for complete lesson understanding & should repeat the process explained in Steps 1, 2, 3 & 4.
